

Stand Out from the Crowd with CAPM® Certification

“25M New project
management-oriented employees
needed to meet global talent demands
by 2030*”

The Certified Associate in Project Management (CAPM)® certification—recognized worldwide—shows that you have the foundational knowledge and skills to handle different types of projects using various approaches; predictive project management, agile principles and business analysis.

No matter where you are in your career, CAPM® certification will make you stand out in the job market. It will boost your credibility and make you more effective when working on projects or with project teams.

Consider getting the CAPM® Certification if you'd like to:

- Pursue an exciting career in project management
- Build on your current skill set and differentiate yourself in your profession
- Power your career as you lay the foundation for the Project Management Professional (PMP)®

(CAPM certification meets the education/training requirement for PMP certification)

CAPM® Certification tests your knowledge through:

- Fundamentals of project management and the role of project managers
- Project management environment, and project iteration management
- Project scope, schedule, cost, quality and resource management
- Project procurement, communication, stakeholder and risk management
- Predictive, agile, and business analysis principles
