New Membership Model – Unified PMI Membership to Enhance Your Professional Experience

1 Simplified access:
The transition to a unified membership model provides a simplified experience for PMI members. Members no longer need to manage two separate memberships for PM and their local chapter. Access to the suite of PMI global resources and the personalized benefits offered by their local chapter are now combined in one single offering, making it easier to take advantage of events, programs, and professional development opportunities.

3 Enhancing member experience:
The unified membership allows chapters to focus more on delivering high quality, exclusive events and programs. This means members can expect to see more targeted and impactful activities that are designed to enhance their career growth and professional journey.

5 Local Expertise, Global Highlights
Members benefit from the unique combination of local chapter expertise and the PMI global knowledge base. They get the best of both worlds – intimate, local engagement alongside the latest trends and thought leadership from a global project management perspective. This helps members stay competitive and innovative in their roles

2 Maximized network:
The new model expands each member's access to a broader network of professionals, both locally and globally. Members can connect with more individuals to collaborate, seek mentorship, and grow their careers. With this larger, more diverse network, members can tap into insights and experiences from a variety of Project Professionals, helping them make more meaningful connections.

4 Diverse industry connections:
By connecting with professionals across a wider range of industries, members will gain new perspectives and opportunities. Whether they're seeking career advice, industry trends, or new opportunities, engaging with members from diverse sectors enriches the chapter experience and helps expand professional horizons.
